

Patients,

We continue to stay open to provide care to the women of Northwest Arkansas but Covid-19 is a serious health concern. In addition to the routine infection control measures that we take, we continue to practice social distancing and enhanced disinfection procedures to limit potential exposure of patients.

- **We no longer require the use of masks or facial covering.** We will respect your choice to continue use and have instructed our employees to do so in your presence should you choose to wear one.
- **We are no longer screening patients and visitors prior to entering our office.** We do ask patients that have signs and or symptoms of COVID 19 to reschedule their appointments. This includes: FEVER, COUGH, DIFFICULTY BREATHING, AND RESPIRATORY ILLNESS.

Thank you for your understanding.
